

30 Expert-Level Conditional Statement Tasks

A collection of 30 Python mini-programs built to practice `if / elif / else` logic using real-world and fun scenarios — from banking systems to alien communication.

Each task is a standalone script that takes user input via `input()` and applies conditional logic to produce a result.

Tasks

#	File	Task
1	Q1.py	ATM / Bank Login System
2	Q2.py	Shopping Discount & Billing Calculator
3	Q3.py	Loan Eligibility Checker
4	Q4.py	University of MITI — Grade Evaluator
5	Q5.py	Mysterious Castle — Text Adventure
6	Q6.py	Airport Security Checker
7	Q7.py	Taxi Fare Calculator
8	Q8.py	Car Rental System
9	Q9.py	Hotel Room Booking
10	Q10.py	Hospital of MITI — Emergency Triage
11	Q11.py	Scholarship Eligibility Checker
12	Q12.py	Credit Card Approval System
13	Q13.py	Lucky Draw
14	Q14.py	Dice Game
15	Q15.py	Magic Spell Chooser
16	Q16.py	Pirate Treasure Hunt
17	Q17.py	Space Mission Launch
18	Q18.py	Robot Assistant
19	Q19.py	Phone Battery Saver
20	Q20.py	Wi-Fi Troubleshooter
21	Q21.py	Detective Investigation System
22	Q22.py	Mars Mission Controller
23	Q23.py	Hospital Diagnosis System
24	Q24.py	DNA Compatibility Scanner
25	Q25.py	Human Brain Test
26	Q26.py	Chemical Lab Experiment
27	Q27.py	Formula Racing Strategy
28	Q28.py	Alien Communication System
29	Q29.py	Football Match Prediction
30	Q30.py	Password Security Checker

How to Run

Each file is independent. Run any task with:

```
python3 Q1.py
```

You'll be prompted for input directly in the terminal.

Tech

- Python 3
- Core concepts: if / elif / else, nested conditionals, logical operators, input validation, string comparison

About

Built by [Ariz Baig](#) while practicing conditional logic in Python.
